

Multicultural Communities in Donation and Transplantation

Did You Know?

Transplants can be successful regardless of the ethnicity of the donor and recipient. However, the chance of longer-term survival may be greater if the donor and recipient are closely matched in terms of their shared genetic background.

More than **100,000** people are waiting for lifesaving organ transplants.

Nearly **60%** of the national transplant waiting list are from multicultural communities.

More than **41,000** organ transplants from **20,300** donors brought new life to patients and their families in 2021.

2021 Multicultural Organ Recipients & Donors*

More than **85,600** corneal transplants help to restore sight each year.

More than **2.5** million tissue transplants heal lives each year.

Thank you to all donors, donor families, registered donors and champions of the Donate Life cause. Support across multicultural communities contributed to a milestone year of lives saved and healed!

The Need is Great

Every **9** minutes another person is added to the waiting list.

17 people die each day because the organs they need are not donated in time.

Deceased Donation

Organ Save up to 8 people	Eye Restore sight to 2 people	Tissue Heal more than 75 people
--	--	--

Living Donation

3-5 years is the average waiting time for a kidney from a deceased donor.

85% of patients waiting are in need of a kidney.

Living donors can provide a kidney or a portion of their liver to a waiting patient.*

**Living donation is not included in your donor registration.*

Top 5 Frequently Asked Questions

Does registering as a donor change my patient care?

No, your life always comes first. Doctors work hard to save every patient's life, but sometimes there is a complete and irreversible loss of brain function. The patient is declared clinically and legally dead. Only then is donation an option.

Does donation affect funeral plans?

Funeral arrangements of your choice are possible, including a viewing. Through the entire donation process the body is treated with care and respect. Following donation, funeral arrangements can continue as planned.

Does my religion support organ, eye and tissue donation?

All major religions support donation as a final act of compassion and generosity.

Does my social and/or financial status play any part in whether or not I will receive an organ if I ever need one?

No. A national system matches available organs from the donor with people on the waiting list based on blood type, body size, how sick they are, donor distance, tissue type and time on the list. Race, gender, income, celebrity and social status, sexual orientation, gender identity or expression does NOT prevent someone from registering as an organ donor.

Why Register to be a Donor?

One donor can save up to 8 lives, restore sight to 2 people through cornea donation, and heal more than 75 lives through tissue donation.
